

PILLOW PAK'R™

WIDEST ON-DEMAND AIR CUSHION IN THE INDUSTRY

← **NEW** → 760 mm wide

Inventing the future of packaging

PILLOW PAK'R system : make your own protective wrap

5 reasons to use PILLOW PAK'R™

Save money and space by eliminating time consuming bubble handling, transportation and storage costs. Unlike traditional packaging material, PILLOW PAK film offers much better cushioning properties due to the air transfer technology. PILLOW PAK is also a good alternative to wrap your largelwide product !

Wrap your sizeable products. (PILLOW PAK inflates to 670 mm wide).

48 rolls of PILLOW PAK = a full truck of pre-made bubble.

Available with accessories for in-line integration.

- 1 Space savings :** reduces the amount of space required in warehouse needed to store traditional packaging material, as you can now produce film as required.
- 2 Reduce damage :** unique air transfer technology improves cushioning : PILLOW PAK film allows air to move (or transfer) between cells providing superior cushioning and protection.
- 3 Easy to use :** simple to operate : make material on-demand where you need it and when you need it.
- 4 Cost effective :** reduce over-wrapping. 26 mm PILLOW PAK bubble height reduces number of wraps while providing same cushioning protection. Let's prove it to you by comparing PILLOW PAK with your current packaging !
- 5 Environmentally Friendly :** less transportation required than normal bubble wrap as 2 pallets (48 rolls) of PILLOW PAK film are equivalent to 1 truck load of bubble wrap. This helps to reduce your company carbon footprint, and savings in material usage add further environmental benefits.
